

5/15/13

Bobby Reilly

For my summer work on the Teen Court Database project, there are four areas of the site that I will need to complete.

The first area is to fix the court section to Marlene's specifications. The updated court page will allow for court information to be set, then have defendant(s) assigned to the court after. Currently one defendant is assigned to one court. Court volunteers and hours will be able to be set after, and can be recorded on the same page.

The second area is to finish the My Program tab. This tab allows the program administrator to edit primary program information, common locations, standard locations, officers, statutes, schools, court positions, court locations, and sentence requirements.

The third area is to have the search options working for defendant, volunteers, courts, and workshops.

The fourth area is to remove the statistics tab and replace it with the reports tab. The two reports that I'll need to have finished are volunteer information reports and basic program statistics.

My deadline for this is to be finished by July 1st.
